

Graber® EvenPleat® and FashionPleat® Pleated Shades Green Info Sheet

SWFcontract

Green Properties of Graber Pleated Shades

- Pleated Shades reduce solar heat gain in the summer and reduce heat loss in the winter by creating an insulating buffer between the interior and exterior. This insulating effect reduces energy consumption and lowers energy costs.
- By blocking UV rays, pleated shades prevent damage to furniture, fabrics and interior finishes protecting the durability of these items and reducing sending damaged products to a landfill prematurely.
- Graber pleated shades carry a limited lifetime warranty and are designed engineered and tested to ensure a long life, reducing landfill waste created by short-lived products. FashionPleat shades are warranted for three years.

Eco-Friendly Raw Materials

- All of the components of this product are 100% recyclable, including the fabric, aluminum headrail and plastic components. Plastic components in pleated shades contain up to 50% pre-consumer recycled material.
- All packaging materials are 100% recyclable. The corrugated cardboard contains 35-40% recycled content. The angle board used to reinforce the cardboard is 100% recyclable and contains 80% post-consumer recycled material and 20% pre-consumer recycled material. Poly tubes, EPS pads, parts tub and bubble wrap used in packaging are also 100% recyclable.
- Custom box cutting machines are used to cut each box to the exact size of the shade. This process eliminates wasted cardboard, packing materials and shipping energy.

Green by Nature is Springs Window Fashion's commitment to the environment.

Graber is a brand of SPRINGS WINDOW FASHIONS the Best Experience Company
