

Bali® Aluminum Blinds Green Info Sheet

Green Properties of Bali Aluminum Blinds

- Aluminum blinds prevent solar heat gain in the summer and reduce heat loss in the winter by creating an insulating buffer between the interior and exterior. This insulating effect reduces energy consumption and lowers energy costs.
- By blocking UV rays, aluminum blinds prevent damage to furniture, fabrics and interior finishes protecting the durability of these items and reducing the need to send damaged products to a landfill prematurely.
- Bali aluminum blinds carry a limited lifetime warranty and are designed, engineered and tested to ensure a long life, reducing landfill waste created by short-lived products.

Eco-Friendly Raw Materials

- Aluminum slats are 100% recyclable. The steel headrail and plastic components are 100% recyclable as well.
- All packaging materials are 100% recyclable. The corrugated cardboard contains 35-40% recycled content. The angle board used to reinforce the cardboard is 100% recyclable and contains 80% post-consumer recycled material and 20% pre-consumer recycled material. Poly tubes, EPS pads, parts tub and bubble wrap used in packaging are also 100% recyclable.
- Custom box cutting machines are used to cut each box to the exact size of the blind. This process eliminates wasted cardboard, packing materials and shipping energy.

Green by Nature is Springs Window Fashion's commitment to the environment.

Bali is a brand of SPRINGS WINDOW FASHIONS the Best Experience Company
